Abstract texts	 Excellent performance Equipped with advanced processors, combined with large capacity memory and storage, it ensures the performance of the phone. Ultra-long battery life The battery has a large capacity and supports fast charging technology, which can maintain six hours of battery life under 120Hz refresh rate and 5G network. Lightweight body The body size is small and the weight is light. Equipped with multiple communication functions and excellent remote control methods. High quality camera Equipped with a high-performance main camera, complemented by an ultra wide angle lens and a telephoto macro lens.	 Excellent performance Equipped with Qualcomm Snapdragon 870 processor, LPDDR5 memory and UFS 3.1 storage, the phone ensures performance in task processing and data transfer. Ultra-long battery life Built in 4520mAh battery, supports 33W fast charging technology, and can maintain six hours of battery life under 120Hz refresh rate and 5G network. Lightweight body The body size is 163.7x76.4x 7.8 millimeters, weighing 195 grams. Equipped with multifunctional NFC. High quality camera Equipped with a 48-megapixel camera, complemented by an 8-megapixel ultra wide angle lens and a 5-megapixel telephoto macro lens.
Concrete texts	 Excellent performance Equipped with Qualcomm Snapdragon 870 processor, LPDDR5 memory and UFS 3.1 storage, the phone ensures performance in task processing and data transfer. Ultra-long battery life Built in 4520mAh battery, supports 33W fast charging technology, and can maintain six hours of battery life under 120Hz refresh rate and 5G network. Lightweight body The body size is 163.7x76.4x 7.8 millimeters, weighing 195 grams. Equipped with multifunctional NFC. High quality camera Equipped with a 48-megapixel camera, complemented by an 8-megapixel ultra wide angle lens and a 5-megapixel telephoto macro lens.	 Excellent performance Equipped with advanced processors, combined with large capacity memory and storage, it ensures the performance of the phone. Ultra-long battery life The battery has a large capacity and supports fast charging technology, which can maintain long-term battery life. Lightweight body The body size is small and the weight is light. Equipped with multiple communication functions and excellent remote control methods. High quality camera Equipped with a high-performance main camera, complemented by an ultra wide angle lens and a telephoto macro lens.

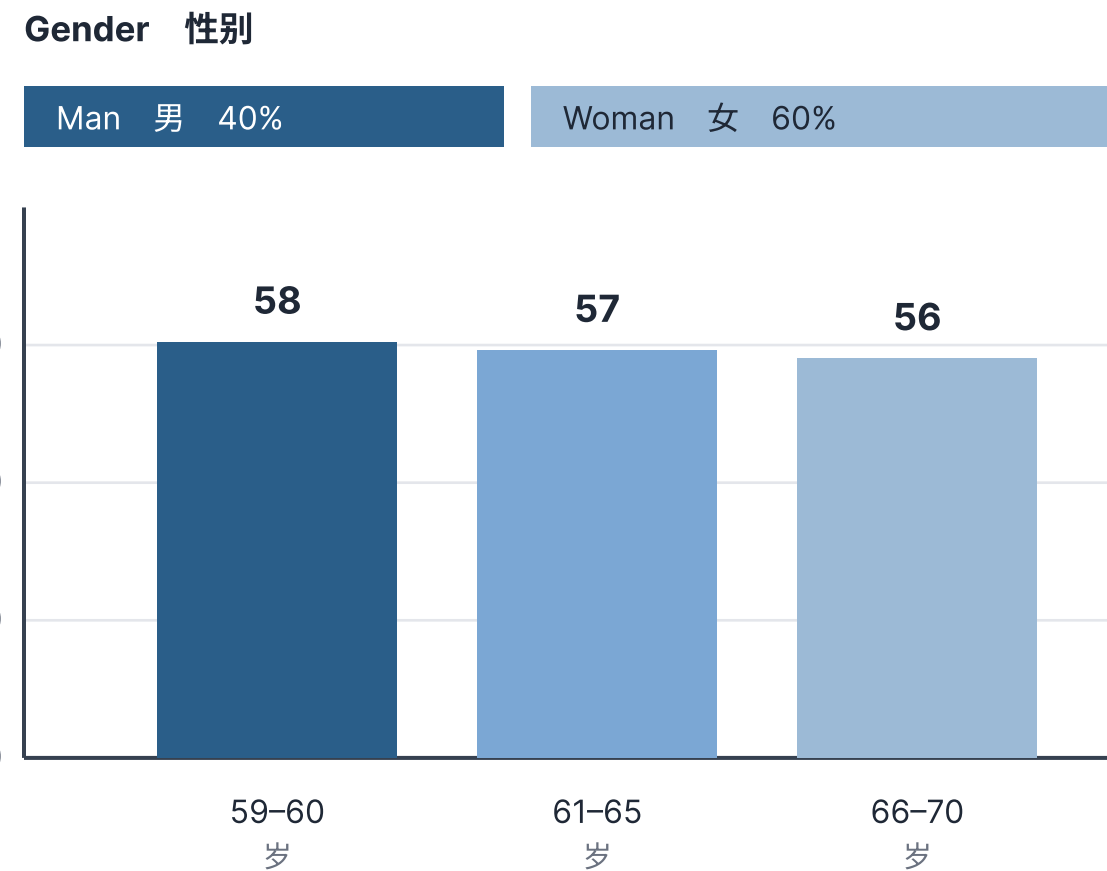

(b) Variables and analysis

(b) 变量与分析路径

(c) Participants

(c) 被试构成

N = 171 (按原稿核对) | Age range 59-70 ; numbers to be verified with the manuscript.

Research Gap, Conclusion and Limitation Dimensions

研究空白、核心结论与局限维度

(a) Previous studies

(a) 既有研究

Focus on exploded views

Previous studies have focused on the use of exploded views in e-commerce environments
既有研究聚焦爆炸视图在电商环境中的应用

Insufficient: elderly population

Research targeting the elderly population remains insufficient
针对老年群体的研究仍不充分（研究缺口）

Cognitive decline with age

Cognitive skills and memory ability decline with age, statistically significant
认知与记忆能力随年龄显著下降

(b) Conclusion: the comprehension threshold

(b) 核心结论：理解存在「阈值」

To enhance perception, detailed pictures and text are necessary — but comprehension has a threshold and stops increasing beyond it.

注：为提升老年用户对产品的感知，需通过图片与文字描述提供详细信息；但该感知存在阈值，一旦达到阈值，便不再随信息量的继续增加而提升。

Note. Detailed pictures and text descriptions are necessary to enhance perception; however, this perception has a threshold, beyond which it no longer increases with more information.

(b) 为阈值趋势示意图 | Panel (b) is a schematic illustration of the threshold effect.

(c) Limitation dimensions

(c) 研究局限维度

● Neglect 研究忽视

Elderly users' needs are often neglected in digital presentation design

● Environmental Discrepancy 环境差异

Laboratory settings differ from real shopping environments

● Geographical Bias 地域偏差

Sample is limited to specific regions, limiting generalizability

注：采用 2（文本抽象性：具体 / 抽象）× 2（图片视图：简单 / 复杂）实验设计，以心理意象为中介变量，考察其对老年用户产品理解的影响，并采用双因素方差分析与中介效应检验。

Note. A 2 (text abstractness: concrete vs. abstract) × 2 (picture view: simple vs. complex) design was adopted, with mental imagery as the mediator. Stimuli shown are schematic placeholders.
