

Measurement items

Service improvement	SI1	“This company uses AI to provide consumers with better-designed products”	Campbell, (2007)
	SI2	“This company uses AI to improve the quality of products designed for consumers”	
	SI3	“This company uses AI to enhance the overall design quality of its products”	
Cost reduction	CR1	“This company uses AI to reduce expenses associated with human designers”	Campbell, (2007)
	CR2	“This company uses AI to cut product design costs at the expense of consumer interests”	

Main Effect

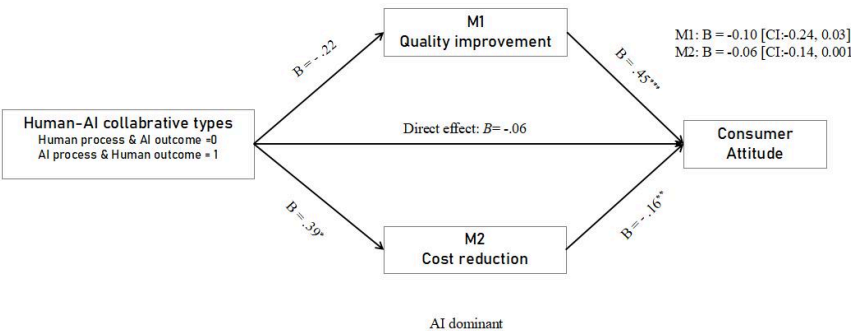

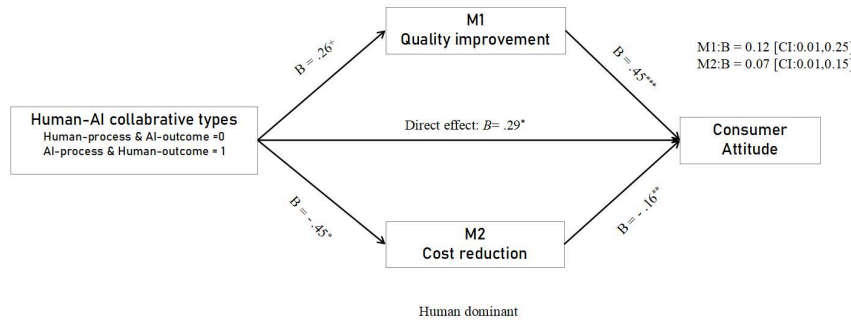

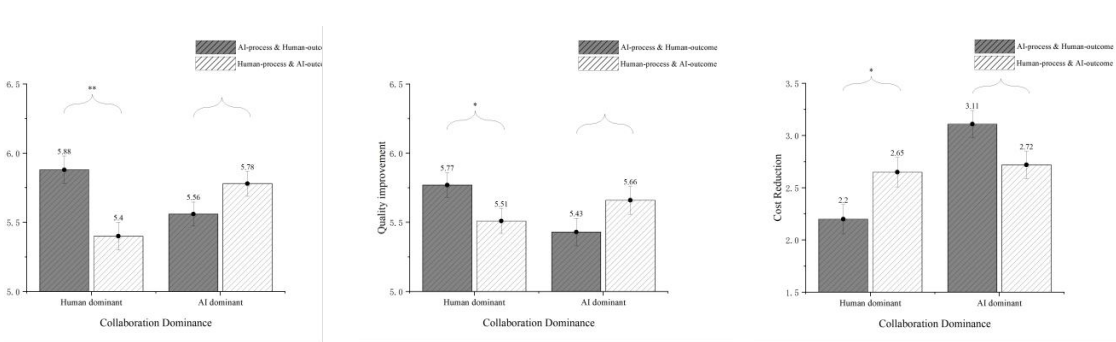

Mediation Analysis

Mediation results in study2. Motes: *p < 0.1, *p < 0.05, **p < 0.01, ***p < 0.001.

当人类主导时，AI process & human outcome的协同方式能够通过提升质量归因并降低成本归因来提升consumer attitude，质量提升 $B = 0.12$, 95% CI[0.01, 0.25]与成本降低 $B = 0.07$, 95% CI [0.01, 0.15]。而在 AI 主导情境下，该效应减弱甚至消失。

Mediation results in study 4. Motes: *p < 0.1, *p < 0.05, **p < 0.01, ***p < 0.001.

Study 4调节中介效应结果
